

Uppsala Berzelii Technology
Centre for Neurodiagnostics

First announcement:

FRONTIERS IN PAIN RESEARCH

The NewSASP Annual meeting will be held in Uppsala, Sweden from 19th - 21st May 2011

We would like to warmly welcome you to this meeting, arranged by:

The Scandinavian Association for the Study of Pain

In cooperation in with:

Uppsala Berzelii Center - please see www.berzelii.uu.se

Main topics:

- ✦ Biomarkers for understanding of pain pathophysiology and choice of treatment - a new field.
- ✦ Imaging of painful processes in peripheral tissues using PET and fMRI - a new diagnostic tool?
- ✦ Nurse lead interventions to improve pain treatment. Frontlines in research.
- ✦ Transduction to sensation - Ion channel news!
- ✦ The role of glial cells in the patophysiology of pain. Are they really relevant to pain in humans?
- ✦ Biological agents (NGF-antibodies etc) in the treatment of pain - how effective are they? And in what pain states?

**Key note speaker on “Biomarkers of pain”: William Maixner, Professor,
Chapel Hill, NC, USA.**

We aim to create an arena with plenty of time for networking, interesting interactions between young researchers and established veterans, from basic and clinical pain research. Heartily welcome to Uppsala , the city of Carl von Linnæus, in May - the beautiful month of the spring flowers!

Torsten Gordh, President of the newSASP, email: torsten.gordh@akademiska.se
